

## Praesidium Advisory Ltd- Response to COVID 19

Dear Valued Client,

The escalation of COVID 19 to global pandemic status has caused much distress and uncertainty. Praesidium is committed to support each other as much as possible. Many of our clients have shared our journey together for many years, and there is a personal relationship we share with many. We hope that all our clients and their family and loved ones stay safe and healthy at this difficult and uncertain time.

Our primary focus is the safety and well-being of our personnel, clients and colleagues, as we continue to deliver uninterrupted service to our Firms, especially in this challenging and unprecedented time.

Following the guidance of various international and domestic public health bodies, we are implementing a number of measures to help minimize risks for our personnel and clients, yet ensure full and minimal disruption of our services. Some of the measures we will be adopting will be shifting in-office and remote working, social distancing and delaying all non-essential in-person meetings.

Praesidium has invested in technology from international jurisdictions over the last couple of years, including our web based bespoke compliance CRM, ensuring that remote working can be deployed without affecting our service delivery.

We are here for our Firms, remain fully operational and stand ready to serve and work with you through this difficult and uncertain period.

Sincerely,

Hari Bhambra

CEO
